

Please continue to allow XM to send local traffic and weather reports. I travel with my XM radio and this allows me to quickly find reliable traffic and weather reports.

This is a fabulous concept, and it will be successful if you do not kill it off.

I have difficulty scanning local radio stations in locations that I am not familiar with. This is a hazard, as I am trying to drive and scan the local radio stations at the same time.

It is particularly useful to me when traveling in Dallas Ft Worth and LA.
